

DAVE GOLD, CIH, CSP, REA 1
President

Mr. Gold has over twenty-two years of experience managing a wide range of safety, health and environmental issues, in a variety of industries and corporate cultures. He is well versed in regulatory requirements and is experienced in single-, multi-, and international site management. Mr. Gold has an extensive background in occupational safety, industrial hygiene, mold investigations, indoor air quality investigations, and ergonomics. He is a qualified expert witness. He holds a Masters of Science degree in Industrial Hygiene from the University of Southern California. He obtained a Bachelor of Science degree in Health Science/Environmental and Occupational Health.

For three years, Mr. Gold was an Assistant Professor in the Health Science Department, Environmental and Occupational Health Program at California State University, Northridge. He has also served as guest instructor in Safety Management, Environmental and Safety Law, and Industrial Hygiene topics for Redlands University's MBA Program, the University of LaVerne's MBA Program, Rio Hondo Junior College and the University of Southern California Extension.

Mr. Gold's affiliations and certifications include:

- Certified Industrial Hygienist – American Board of Industrial Hygiene
- Certified Safety Professional, Management Aspects – Board of Certified Safety Professionals
- American Industrial Hygiene Association
- Diplomate – American Academy of Industrial Hygiene
- American Society of Safety Engineers, Valley Costal Chapter (Officer since 1995)
- Registered Environmental Assessor 1 – California Environmental Protection Agency
- Certified California DHS Lead-Based Paint Inspector/Assessor and Project Designer
- Registered Environmental Health Sanitarian (inactive)

PROFESSIONAL EXPERIENCE

- Assisted the Occupational Safety Office of the Cal-Tech/NASA Jet Propulsion Laboratories by auditing and upgrading the Medical Surveillance Program records and database. Conducted surveys of Lab facilities and industrial hygiene sampling to determine necessity for personnel to be included in the Medical Surveillance Program. Developed MS Access database for tracking Pre-Operational Safety Reviews. Assisted with the indoor air quality issues and with the Laser Safety Program.
- Responsible for all Health and Safety issues within several major facilities and subsidiaries of GTE. Assisted with region-wide training and implementation of the Behavior-Based Safety process. Developed and implemented databases in MS Access for incident root-cause analysis and safe behavior observation tracking. Coordinated regional ergonomics program resulting in significant reduction of cumulative trauma injuries.
